A message from the Director

Sarla Anil Modi School of Economics offers an exciting academic environment with its programs which are multi-disciplinary, rigorous, contemporary and highly relevant. The aim is to create independent and creative learners and to impart cognitive, life and work-related skills. Summer internships from the first year of the program, value-added courses, projects and industry interface help to develop our students' competencies and prepare them to meet the employers' unique and changing needs. Our students have been placed in the top Universities and organizations.

Our School is happy to have a sustained relationship with the recruiters and I look forward to both our organizations benefitting from the relationship.

- Amita Vaidya
Director, SAMSOE

About our Courses

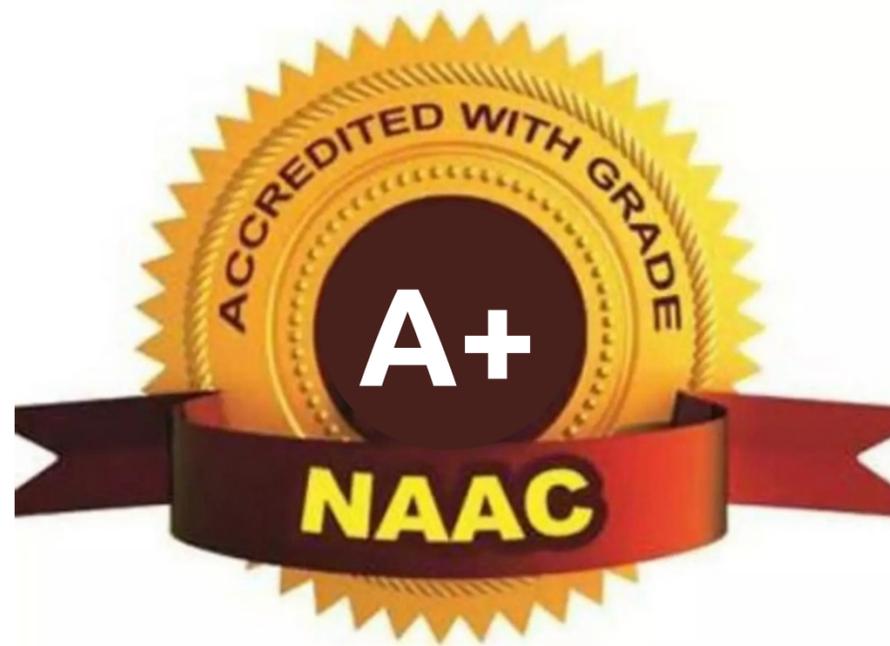

B.Sc. Economics 3 Years

B.Sc. Economics is a 3-year, full-time, six semester-based graduate-level program with specializations in Finance, Economics, and Business Management. The program is designed to challenge young minds, stimulate intellectual growth and provide a thorough understanding of economic concepts with a comprehensive grounding in the analytical methods of economics. Students are also trained to work on statistical programs like SPSS, R, Advance Excel and undergo in-house soft skill training. The program lays emphasis on the overall development of the student, through academics, co-curricular activities, mandatory industry exposure of 6-8 weeks and internships. Admission to B.Sc. Economics is through NPAT (NMIMS official entrance test) for candidates securing a minimum of 60% with Mathematics as a compulsory subject in grade 12. B.Sc. Economics students ideally secure jobs in BFSI, Consulting, Market Research, Rating Agencies, Analytics, E-commerce, IT & ITES sectors for positions such as data analyst, financial research associate, market research analyst and business analyst to name a few.

M.Sc. Economics 2 Years

M.Sc. Economics is 2 years - 4 semester-based full time course offered by Sarla Anil Modi School of Economics. This innovative course builds on the traditional framework and introduces students to modern-day economics. This Masters program is intellectually demanding and stimulating. It provides students with the necessary tools for a high-flying analytical career in economics. The program provides discourses in various fields of economics and an in-depth understanding of the theoretical and empirical constructs in the field of economics. The program helps the students develop the ability to build and test economic models using advanced methods and sophisticated economic tools. The program is flexible with a wide range of electives to choose from. Professional development of students is weaved throughout the curriculum with various workshops, seminars and dedicated soft skills courses. It trains students for research and its applicability to practical situations in real-life scenarios.
